

MORSØ

Autogage 1700

Automatic Measuring System

Quality, service, and experience
since 1911

The Morsø Autogage 1700 makes it very easy to measure the length of your mouldings. The system has a touch screen where the values are entered. You are sure always to have the correct length of your moulding.

The width of the moulding is measured manually with the handle shown on the small picture. Then you enter the two values for the short and the long length in the digital display with touch screen. Touch the button for the short length, and the stop beam will automatically go to the length entered. Touch the button for the long length and the stop beam will automatically go to the position for the long length.

*The Morsø Autogage 1700
can be fitted onto:*

MORSØ-F

MORSØ-H

MORSØ-EH AND EHT
