

Clean Cut

# MORSØ

## Mitring Machine E

Quality, Service and Experience  
since 1911

### Future Green

fully automatic, electric, model EFG

**NO DUST – NO COMPRESSOR NEEDED**

100 % noiseless  
for the green eco-friendly production

#### MORSØ-E Future Green is delivered with:

Two hand release operation, safety guard, sliding longitudinal stop, second stop, measuring scale up to 1500 mm, waste chute, extension table for the left side, adjustable fences, adjustable and automatic rebate supports and clamping cylinders.

#### MORSØ-E Future Green

is available three phase with voltage to your requirements.

MORSØ-E Future Green is a fully automatic, electric mitring machine with a two-hand release built on. This makes the machine absolutely safe to operate as it is impossible to start the machine and touch the knives at the same time.

With MORSØ-E Future Green you achieve the clean smooth cut by automatically cutting of the work piece in two cuts, as long as both push buttons are activated at the same time. The cutting time varies from 1 second and up, depending on the thickness of the work piece. Having finished the cutting, the knife block automatically returns to the starting position.

The starting position (horizontal movement) is adjustable up to 60 mm, (Max. width of work piece is 100 mm.) and from 60 mm the MORSØ-E Future Green will automatically cut the work piece bit by bit. The variable start position is adjusted by a handle placed on the machine.

The vertical movement of the knife block is also adjustable with three different heights. Pos. 1 for small work pieces, pos. 2 for medium size work pieces and pos. 3 for very thick work pieces, up to 180 mm.

MORSØ-E Future Green is excellent for repetition work, as it:

- is faster than a double mitre saw
- leaves no dust behind
- 100 % noiseless
- cuts an exact and perfect 45-degree mitre

#### Technical data Morsø-EFG

Double Mitre	45°
Single Mitre up to	90°
Cutting width max.	100 mm (4")
Cutting height max.	180 mm (7")
Square Cutting	70/70 mm (2 ¾")
Measuring scale up to	1,500 mm (60")
Motor three phase	0,55 kW
Net Weight	135 kilos
