MORSØ SLOT MILLING MACHINE

Morsø Slot Milling Machine

is a quick and effective automatic slot milling machine for doors and windows.

The milling machine can work both horizontally and bevelled. On the standard machine the adjustment from horizontal to bevelled position takes place manually. Upon request the machine can also be delivered with automatic adjustment from horizontal to bevelled position without having to remove the work piece from the mounting.

Depending on the length and the depth of the slot the processing time will be 10 – 15 seconds per slot.

Quick and easy adjustment of the length and depth of the slot.

The machine can also be supplied to do more slots simultaneously. Furthermore it is also possible to supply the machine with automatic through feed.
